CCTV Visual Detection Systems

CCTV

Electro Automation provide CCTV and video surveillance solutions for large, medium and small commercial installations in applications from small retail to large shopping centres, car parks (surveillance & number plate recognition) and high security applications demanded by financial institutions and metropolitan areas within major cities.

Advanced Digital Video CCTV Technology

We use advanced digital video equipment manufactured by some of the worlds leading security companies to configure totally reliable and scalable video surveillance solutions.

CCTV Cameras

Electro Automation provide and install a wide range of professional security cameras and supporting equipment to meet all technical and environmental requirements including: colour security cameras, day and night CCTV cameras, infrared security cameras, dome security cameras, black and white security cameras, bullet security camera, covert cameras, pan tilt zoom (ptz) cameras, auto-zoom security cameras, dummy cameras, IP & networked digital security cameras including all accessories.

Our security products are designed to interconnect and form security systems targeted at all levels of applications whether small or large.

Security Integration

Key to the success of any security system is flexibility to both upgrade and expand the system. The video surveillance portfolio can be easily expanded as the application needs change. Integration with access control and intrusion detection systems allows for a complete security system all from one supplier.

Electro Automation

Electro Automation Group is widely regarded as Ireland's premier automation specialist. Formed in Dublin in 1984, Electro Automation has since provided an enviable combination of quality equipment supported by exceptional technical after sales and maintenance service.

Our CCTV System Design, Installation and Maintenance Support Department are actively supplying, installing and maintaining a large range of CCTV and video management equipment to many clients. We can design, supply, install and maintain complete CCTV surveillance systems for small, medium and large projects, or take over existing systems, integrate and upgrade.

Our success is based on pride in our technical competence and the practice of our belief that exceeding customer expectations is our key aim.
